Around 35,000 people die of lung cancer every year in the UK.

Early diagnosis saves lives.

If you are presented with one or more of the following symptoms - regardless of patient age or smoking status - please consider a chest x-ray or a referral on the Lung Cancer Pathway.

Persistent cough 

Breathlessness 

Recurring chest infections 

Back / shoulder pain 

Face / neck swelling 

Jaber, 37, never-smoker

Symptoms: persistent cough, breathlessness

Stage IV lung cancer diagnosis

See Through The Symptoms is a national campaign to encourage all healthcare professionals to consider lung cancer for persistent or unexplained symptoms regardless of smoking status or age.

The campaign has the support of the British Thoracic Oncology Group, the British Lung Foundation, the Taskforce for Lung Health, Macmillan Cancer Support, GatewayC and the Primary Care Respiratory Society as well as leading respiratory physicians and oncologists. For more information, please visit www.lungcancerseethroughthesymptoms.uk

Never-smokers get lung cancer too.

Lung cancer is the biggest cause of cancer deaths in the UK. Over 57% of patients are incurable at diagnosis.

Lung cancer in never-smokers is now the 8th most common cause of cancer related death in the UK.

If you are aware of anyone with persistent or unexplained symptoms, please encourage them to speak to their GP.

Persistent cough

Breathlessness

Recurring chest infections

Back / shoulder pain

Face / neck swelling

Faye, 28, never-smoker

Symptoms: back pain, persistent cough

Stage IV lung cancer diagnosis
